School Committee Reports

Keith Cheveralls with the assistance of Fire Chief Mignard provided background information to the Committee on the oil tank replacement at both schools. Chief Mignard received a recommendation that the tank at the Elementary School be replaced with an external tank. The Committee did not believe an external tank would be feasible, and they discussed containment vessels, vaulted or double walled. The Chief stated that underground tanks require more regulation, and the approximate cost of remediating a leak would be $30,000.00. Soil tests are required after a tank is removed. The Elementary tank just passed a pressure test. It is approximately $70,000.00 per tank to remove and replace it without remediation. Keith discussed an annual grant program which offers a potential of 50% costs excluding any remediation. The Committee discussed investigating the feasibility of using the new gas line. This would require a new dual burner boiler. Keith recommended a side by side comparison of the costs. Chief Mignard recommended the Elementary school tank be replaced as soon as practical. Lorraine Leonard will determine the costs for capital planning. Chief Mignard thanked Mark Force and his department for their assistance during the ice storm, and Dr. Jefferson thanked Chief Mignard for his leadership and efforts as well.
