Keith spoke with the Committee about the significant safety issues identified by Galleotta and the CPIC action to cover contingency and identify priority items to fall under $75,000. The number one priority is to approve getting a quote for an air quality moisture mold analysis to find a way to remediate the moisture in the basement. The second priority is to get a professional evaluation of the electric system, third would be to see if we are eligible to tie into town sewerage, and fourth would be the need for a hot water heater. Keith suggested we get an expert opinion of a full building structural analysis and comprehensive report on cost estimates to perform this work. Keith requested the School Committee support the CPIC identification of $75,000 to support critical need repairs at The Bromfield House.
