Professional Development Plan (Act 48) | 2021 - 2024

ACT 48

Chapter 4 establishes that each school entity shall submit to the Secretary for approval a professional education plan every 3 years as required under Chapter 49, Section 17(a). A school entity shall make its professional education plan available for public inspection and comment for a minimum of 28 days prior to approval of the plan by the school entity's governing board and submission of the plan to the Secretary.

Chapter 49.17, Continuing professional education, establishes that every school entity shall develop a continuing education plan that addresses the following requirements:

- a. Includes options for professional development including, but not limited to, activities such as: (i) graduate level coursework; (ii) obtaining a professionally related master's degree; (iii) department-approved in-service courses; (iv) curriculum development work; and (v) attendance at professional conferences.
- b. Defines terms used including, but not limited to, the following: (i) Professionally related graduate level coursework. (ii) Professionally related master's degree. (iii) Curriculum development work. (iv) Professional conferences.
- c. Developed as specified in section 1205.1 of the act in which the plan describes the persons who developed the plan and how the persons were selected.
- d. Submitted to the Secretary shall be approved by both the professional education committee and the board of the school entity.
- e. Includes a section which describes how the professional education needs of the school entity, including those of diverse learners, and its professional employees are to be met through implementation of the plan. The plan must describe how professional development activities will improve language and literacy acquisition for all students and contribute to closing achievement gaps among students.
- f. Includes a description of how the school entity will offer all professional employees opportunities to participate in continuing education focused on teaching diverse learners in inclusive settings.

g. A school district that contracts with a community provider to operate a prekindergarten program shall address in the school district's professional education plan how the school district will offer professional education opportunities to teachers in the community provider's prekindergarten program.

LEA provided professional education meets the education needs of that school entity and its professional employees, so that they may meet the specific needs of students. Professional education for all levels of an LEA should be based on sound research and promising practices that promotes educators' skills over the long term.

Exemplary professional education for staff:

- Enhances the educator's content knowledge in the area of the educator's certification or assignment.
- Increases the educator's teaching skills based on research on effective practice, with attention given to interventions for struggling students.
- Provides educators with a variety of classroom-based assessment skills and the skills needed to analyze and use data in instructional decision-making.
- Empowers educators to work effectively with parents and community partners.

EVALUATION AND REVIEW

DESCRIBE IN THE BOX BELOW THE PROCEDURES FOR EVALUATING AND REVIEWING THE PROFESSIONAL EDUCATION PLAN.

The Central Columbia School District uses many layers of implementation and evaluation to assure that the district's professional education plan meets the needs of every student, teacher, and administrator. The Act 48 Committee, comprised of parents, teachers, and administrators oversees the professional development plan and meets every other month to review district data related to student achievement, progress towards district goals, and teacher, parent, and student perception data, etc. The committee determines the need for professional development at each level and seeks input from their stakeholder group. Needs may include specific content area training, research-based teaching strategies, analyzing assessment and data, school safety and culture, technology, etc. The committee determines if the need is immediate or should to be scheduled for the summer or following school year. This professional development may be in the form of a formal training, release time, webinar, book study, etc. Currently, the district has opted to use a Train-The-Trainer model, if available. This allows the district to invest in teachers and administrators who are interested in seeking a leadership role in the district. With this model, the district receives up to date training, as well as reduces the cost of sending teachers to specific trainings. The district uses Edpuzzle and safe schools to start the process of creating professional development online as well as in person. PA-EETP is used for professional evaluations and to collect data on PD needs. A group of teachers met in the summer of 2015 to begin writing courses which align the district's teaching strategies requirements to the Danielson Framework. This work is an ongoing process as we continue to build our library of online trainings. The district began offering these courses in the 2018-2019 school year. These courses are also aimed at new teachers, student teachers, and Professional Development School students. Mandated trainings such as suicide prevention and mandated reporter are done using "safeschools" by Vector. This product is in compliance with all PA sponsored mandates for employees. Department Heads for each department analyze data specific to their department by themselves and in collaboration with their department. This may be in the form of standardized tests, Unit Common Assessments, formative assessments, etc. In collaboration with the building principal and district curriculum coordinator, it is determined whether there is a need for professional development specific to a content area. Specific conferences, trainings, or webinars will be identified and scheduled for the department. At the building level, data teams meet weekly to review building data such as achievement, attendance, behavior, culture, and progress towards specific building initiatives. These data teams, in collaboration with the building principal, identify

areas of needed professional development and the method in which to provide the training. This training may occur during each building's AM Professional Time, team meeting time, release time, or after school.
